

**FOR IMMEDIATE RELEASE-10/23/25**

**NASO INDUSTRIES CORPORATION Expands Advanced Manufacturing Capabilities with New Micro-Electronics, MEMS, and Flex Assembly Services and the Acquisition of CAM- Expert**

**Ventura, CA. — 10/23/25 — NASO INDUSTRIES CORPORATION**, a trusted leader in Electronics Manufacturing Services (EMS) and precision machining for over 35 years, today announced the expansion of its service portfolio to include micro-electronics, MEMS (Micro-Electro-Mechanical Systems), and flexible circuit assembly. In addition, the company has completed the acquisition of CAM Expert, an industry leader in the production of front panels for defense, avionics, medical, transportation, and audio systems.

With a strong heritage serving direct Department of Defense manufacturing, medical devices, EV Systems, Seismic monitoring system to mention a few. **NASO INDUSTRIES CORPORATION** delivers full turnkey solutions, including 5 axis machining, 7 axis Swiss precision machining, PCB assembly, box build, test, system integration and order fulfillment. The addition of micro-electronics and MEMS capabilities enables the company to support the growing demand for miniaturized, high-reliability electronic assemblies in advanced applications.

“This expansion reflects our long-standing commitment to innovation, precision, and total customer support,” said **Joseph Biro**, of **NASO INDUSTRIES CORPORATION** “Integrating micro-electronics, MEMS, and flex assembly strengthens our position as a single-source manufacturing partner, while the acquisition of CAM Expert enhances our mechanical and aesthetic capabilities for high-end systems.”

**CAM Expert** is recognized for its precision front panel manufacturing, combining advanced CNC machining, finishing, and graphics integration to meet the most demanding requirements of the defense, avionics, space, medical, transportation, and audio industries. This acquisition brings specialized expertise and equipment that will complement **NASO INDUSTRIES CORPORATION**’s electronic and mechanical integration capabilities.

The acquisition of Cam-Expert and expanding our service offering allows us to bring our craftsmanship and process expertise into a broader advanced manufacturing environment, we’ll deliver complete system-level solutions that meet the highest standards of performance and design.”

The integration of CAM Expert strengthens **NASO INDUSTRIES CORPORATION**’s vertical manufacturing model—providing end-to-end capability from micro-electronics and flex assembly to enclosure machining, front panels, box build, and test. Customers will benefit from reduced lead times, improved quality control, and a seamless transition from concept to production.

---

**About NASO INDUSTRIES CORPORATION**

With over 35 years of experience in Electronics Manufacturing Services (EMS) and precision machining, **NASO INDUSTRIES CORPORATION** delivers full turnkey manufacturing

solutions to the defense, medical, industrial, and commercial markets. Services include PCB assembly, micro-electronics, MEMS, flex assembly, 5 axis machining, 7 axis Swiss precision machining, box build, test, and full system integration.

### **About CAM Expert**

CAM Expert is an industry leader in the design and production of precision front panels for defense, avionics, medical, transportation, and audio systems. Known for its attention to detail, advanced manufacturing processes, and commitment to quality, CAM Expert's expertise enhances the visual, functional, and structural elements of complex electronic assemblies.
